Glossary

Model Parameters

	RMS	AIR
Model Version	RiskLink v18.1	Touchstone v7
Event Set	2019 Historical	100k Standard
Demand Surge	Included/Excluded	Included/Excluded
Storm Surge	Excluded	Excluded

RMS Fields

Code	Name	Definition
EventID	Event Identifier	Event identification code, which represents a specific event.
RATE	Rate	Frequency at which a given event occurs according to the model. Also known as primary uncertainty, or the likelihood that an event will occur.

AIR Fields

Code	Name	Definition
EventID	Event Identifier	Combination of model code, which represents event type, and event identification code which represents a specific event.
Year	Catalog Year	AIR uses a stochastic catalog containing potential scenarios of events in a year. The "year" field represents the simulated year in the catalog.

Loss Fields

Code	Name	Definition
GU_Loss	Ground Up Loss	Pure modeled loss that does not take into account limits or deductibles. These losses also account for a Cat LAE factor.
GR_Loss	Gross Loss	Modeled loss taking into account limits and deductibles. These losses also account for a Cat LAE factor.
wDS	Demand Surge	Includes amplification of losses to account for the fact that after a catastrophe occurs, demand for building materials and/or labor increases, causing the cost of those to increase as well.
xDS	without Demand Surge	Demand Surge excluded.

Windfall Parameter Fields

Code	Description
Landfall State	State in which storm made first US landfall or bypass. For events that have no landfall/bypass in the US, this field contains the country/region of first landfall/bypass.
Landfall County	US County in which storm made first US landfall or bypass. For events that have no landfall/bypass in the US, this field is blank.
SS_Intensity	Saffir-Simpson storm intensity of the storm, based on wind speed at the point wind speed is assigned (below).
WindSpeed	Wind speed in MPH. RMS landfalling: Maximum wind speed at the 6 hourly point before landfall. RMS bypassing: maximum wind speed at the bypass gate center. AIR: Maximum wind speed at point 1 hour prior to landfall/bypass.
