CIRCULAR LETTER TO ALL MEMBER COMPANIES

Re: Workers Compensation Insurance  
Changes to North Carolina Statistical Plan Manual  
Introduction of Stat Code 9841

The Bureau has adopted and the North Carolina Commissioner of Insurance has approved the implementation of Statistical Code 9841 for use in North Carolina.

The filing to implement Statistical Code 9841 – Drug Free Credit Subject to Experience Rating is effective January 12, 2007. The reason for this proposal is to provide the appropriate stat code for any company that would receive an approval to use a drug free credit subject to experience rating.

The North Carolina Statistical Plan Manual has been updated to include this change.

Sincerely,

Sue Taylor

Director of Workers Compensation
